IAP Statement on Walter Reed Army Medical Center

Cape Canaveral, Florida – IAP Worldwide Services, Inc., today issued the following progress report following the company's first month of providing base operations and facility maintenance work at the Walter Reed Army Medical Center (WRAMC).

IAP's contract at the Walter Reed Army Medical Center began Feb. 4, 2007. Under the competitively awarded contract, IAP operates and maintains the infrastructure and physical plant at WRAMC. IAP does not provide patient medical care.

Since beginning work on Feb. 4, 2007, IAP's personnel and staff have responded with a sense of urgency to address maintenance concerns throughout the WRAMC complex. IAP's personnel and staff are fully committed to addressing facility maintenance and preservation tasks assigned by the Army.

From the first day, IAP has maintained a full complement of employees and subcontractor personnel. On Feb. 4, 2007, 290 IAP and subcontractor personnel began work. Of those, 100 personnel were assigned to facility maintenance work. On March 5, 2007, 305 personnel were at the job.

When a requirement for maintenance is identified at any of the WRAMC buildings or facilities, IAP works with the U.S. Army to follow a procedure that ensures that the highest priority facility maintenance items are addressed first.

IAP Worldwide Services is a leading government contractor providing a broad spectrum of services focused on global mission support for the Department of Defense and other U.S. government agencies with a history of support for more than 50 years. The company specializes in three lines of business: global operations and logistics; facilities management and base operations support; and professional and technical services. With operations headquartered in Cape Canaveral, Fla., IAP also maintains corporate offices in Irmo, S.C.; Panama City, Fla.; and Washington, D.C.; and project sites in over 100 locations worldwide. IAP's Worldwide Web site can be accessed at www.iapws.com.
